JustinTime Personal Training Development of Induction Videos

Last year, Justin Moran approached Freshwater Place committee of management to develop induction videos for residents requiring access to our gymnasium and pool facilities.

Our committee recognized the need to ensure all residents wishing to use these facilities need an appreciation of the health and safety issues attached to these areas. Furthermore, the use of videoing technology offered the opportunity for our building management to create an automated link to manage access to these areas, ensuring that induction had been undertaken before access was granted.

Subsequently Justin worked closely with FwP to develop a quality product which has now been fully implemented and is available on our Freshwater Place 'app', and on our website. (www.fwp.net.au)

We believe these videos have enhanced our internal processes, and offer our residents an efficient and highly effective means to complete their induction processes on-line.

We continue to have a close working relationship with Justin, and commend to you his professionalism and expertise in providing a first class service for our residents.

Yours Sincerely

Peter Renner
Chairman, Freshwater Place CoM
